Official Fuel Consumption in MPG (l/100km) and CO₂ emissions (g/km) for the PEUGEOT 108 range are: Combined 51.6 (5.5) - 58.9 (4.8) and CO₂ 98 - 85 g/km.

The fuel consumption you achieve, and CO₂ produced, in real world conditions will depend upon a number of factors: including the accessories fitted (post registration), variations in weather, driving styles and vehicle load. There is a new test (WLTP*) used to measure fuel consumption and CO₂ figures. The fuel consumption figures shown in this advert are calculated under the WLTP test. The CO₂ figures shown are NEDC equivalent (NEDCeq), calculated using EC correlation tool which converts WLTP figures to NEDC figures, however, these NEDCeq figures are based on the outgoing test cycle (NEDC**) and will be used to calculate tax for first registration. Figures shown are for comparability purposes; you should only compare fuel consumption and CO₂ figures with other vehicles tested using the same technical standard.

* WLTP - Worldwide harmonised Light vehicles Test Procedure.
** NEDC - New European Driving Cycle. Information correct at time of going to print.
